## **ENTACT Environmental Services on ENR Top 200 Environmental Firms List**

ENTACT, LLC, a recognized industry leader in providing environmental remediation and construction services to a national client-base, has been ranked number 59 on ENR's Top 200 Environmental Firms List for 2010.

Established in 1991 in Dallas, Texas, ENTACT was founded on the belief that regulatory compliance, technical excellence, safe field performance, and sound business practices are all necessary to deliver outstanding environmental remediation projects. ENTACT's specific remediation skill sets include solidification/stabilization, geotechnical services, slurry wall construction, sheet pile installation, earthwork/material management, soil treatment, former MGP site remediation, cap and containment system construction, residential lot remediation, decontamination/demolition, groundwater remediation, wetlands and sediment remediation, treatability studies, and water treatment.

ENTACT is a direct self performer of environmental remediation services and possesses a strong fleet of heavy equipment. Significantly, ENTACT is composed of a unique group of talented individuals possessing a variety of backgrounds and experience. ENTACT's roster includes project managers, certified safety specialists, equipment operators, certified hazardous material managers, field technicians, and technical professionals with diverse capabilities and extensive qualifications.

Most importantly, safety is the most important aspect of every ENTACT project. Nothing is more important than human life. ENTACT's corporate Health and Safety Program is structured in a manner that meets or exceeds the industry standards for health and safety while providing the most cost-effective service for clients.
