ENTACT Environmental Services Opens Salt Lake City Office

ENTACT, LLC, a recognized industry leader in providing environmental remediation and construction services to a global client-base, has opened an office in Salt Lake City, UT. The new office will manage a variety of projects in the Rocky Mountain Range, west coast region, and additional national locations. The Salt Lake City office is the 9th United States office location for ENTACT.

Established in 1991 in Dallas, Texas, ENTACT was founded on the belief that regulatory compliance, technical excellence, safe field performance, and sound business practices are all necessary to deliver outstanding environmental remediation projects. ENTACT's environmental remediation service elements include Engineering and Technical Services, Regulatory Strategy, and Field Remediation and Construction activities. Specific skill areas include: Solidification and Stabilization, Soil Treatment, Earthwork and Material Management, Former Manufactured Gas Plant (MGP) Remediation, Residential Lot Remediation, Barrier Wall Construction, Sheet Pile Installation and Shoring, Cap and Containment System Construction, Wetlands and Sediment Remediation, Groundwater Remediation, Decontamination and Demolition, and Treatability Studies.

ENTACT is a direct self performer of environmental remediation services and possesses significant internal professional resources in the geosciences, regulatory compliance, and civil engineering disciplines. These resources are dedicated to the enhancement of ENTACT's field services implementation, and to the application of safe and innovative technologies. ENTACT applies this deep and wide institutional knowledge to the design and execution of successful remedial construction solutions.

ENTACT's commitment to excellence and a desire to establish long term environmental remediation client relationships through partnering, creativity, and risk management, has allowed for exceptional growth. ENTACT's regional offices include Chicago, Dallas, Greensboro, Houston, Philadelphia, Pittsburgh, Charleston, Salt Lake City, and San Francisco. ENTACT's environmental remediation experience includes work on projects throughout the United States, Canada, Mexico, Puerto Rico, and select international locations.

ENTACT has repeatedly been named to ENR's "Top 200 Environmental Firms" list and was recently ranked in the **top 20 for 100% environmentally driven** firms for 2008. ENTACT is also ranked #21 on **Zweig White's** fastest growing firms in its "Hot Firms 2008" list. In 2008, ENTACT was the only environmental remediation and construction firm awarded for outstanding safety performance and practices by the **National Safety Council**.
